Profile

I am a creative, enterprising, objective oriented computer engineer, specializing in design, development and mounting systems in a Web platform. While in Canada, I want to continue to gain experience in my field, improve my skills and learn more about the local business culture. Always looking forward to grow professionally.

Summary of Qualifications

- Adaptable to change
- Organized
- Motivated
- People oriented
- Strong communication and analytical skills
- Web languages (Java 8, Node.js, Html5, Typescript)
- Design mobile solutions (Android)
- Design and implementing relational databases. (MySQL)
- Document Databases NoSQL (MongoDB).
- Search engines (Elasticsearch)
- Web Services with SOAP and REST API
- Microservices (Spring Boot, Loopback JS)

Work Experience

Software Engineer

Architect <http://architech.ca>

- Contributing to a logistic management application for the shipping of Coal Internationally.
- Building Microservices to support the load of the application and rapid production deployments.
- Working as a Full Stack developer maintaining and improving application using Spring Boot for the backend and Angular for the front end.
- Improving the CI/CD pipeline to allow rapid deployments into the development and production servers.
- Creating new features to maximize the work done in the terminals when Trains and Vessels arrive to the terminal to load coal and shipping it around the world.
- Translating business requirements in an Agile environment working with a local and a remote team.
- Designing new features to maximize the time of the crew in the terminals.

Software Developer II

Experian Inc. Canada (Full time) <http://www.experian.com> **February 2014 – October 2017**

- Accomplished with my Team an effective migration from a legacy Monolithic system to a new Architecture based on Microservices. Queries were optimized by changing the way information was stored and implementing **NoSQL (MongoDB)** Databases to store dynamic documents in a more efficient way.
- Search Engines like **Elasticsearch** were used to reduce the time of searching for information by using customized and dynamic queries for the clients.
- Services Discovery systems (**Zookeeper**) were applied to maintain more than 10 Microservices collaborating using **Spring Boot** framework.
- In collaboration with my team we have created a Dynamic Hosted Data source solution where clients were able to configure dynamic fields and store their information for future optimized searches. The product is being used in more than 5 Countries including (Australia, UK, Brazil, Canada, Spain, Italy)
- The Agile environment process followed by Experian allowed me to successfully collaborate with local and remote teams in Bulgaria as a Scrum Master of a team of 7 people to comply with the deadlines and the proper planning of the future Sprints.
- During my time working on Experian a DevOps culture was acquired so that we were able to do continuous Integration and Deployment to production servers with automated Tests using **Cucumber** Framework.

Neology, Mexico City - <http://www.neology-rfid.com>

- Web developer for international car registration system using RFID technology (Nigeria, India, Turkey).
- RFID technology integrator with web and mobile technology (JSF, RichFaces, MySQL, Linux, Tomcat).
- Installing the web systems and training people in different states in Mexico.
- Designed and developed mobile solutions for car registration system.
- Linux administration for Java Web Platform.
- Lead team of 6 people to work on the improvement and optimization of a web system.

International Work Experience

Neology, Mexico City

January 2011

Tolling system proposal in Ankara, Turkey

- Developing, installation and presentation of Radio Frequency Identification solution for tolling service.
- Direct communication with client to analyze, document, evaluate and manage system requirements.
- Creation of different prototypes using Java to present cars data to the client using RFID readers.

Certifications

Professional Scrum Master | May 2016

Link: [Professional Scrum Master Certificate](#)

R programming | October 2016

Link: [R Programming](#)

ILSC <http://www.ilsc.com>

Toronto 2013

- International Business English Certificate.
- Working on Oracle Java SE 8 Programmer Certification and AWS Associate Developer

Education

Degree in Computing Engineering

IPN (Polytechnic National Institute)

Mexico City 2006 - 2010

Professional Development (courses)

- Machine Learning (UoT)
- React Nanodegree
- Relational databases design
- Business Intelligence with Pentaho.
- Web development with Java technology – R Language
- Practical Machine Learning
- Spring, Hibernate, Rich Faces, JSF frameworks
- Computer technical support

Language skills

English: Professional working proficiency

Spanish: Native language

Extracurricular Activities

Swimming, Freelance web and app development, research, learning new languages. Creating short-films.

Personal projects:

Mobile App: Express Entry Monitor <http://expressentrymonitor.com/>
